POLICE HORSE PROTECTION
HORSE CHEST PLATE
Technical Specifications

Product

The chest plate gives excellent protection to the horse against thrown objects and hits in Riot control situations from the front. The protector can be attached to the horse blanket with metal hooks.

The Chest Plate consists of 3 separate moulded plastic pieces: one on the front and one on each side. The protective elements are stitched on the foam/textile part. The reflective bands are stitched on the plastic to secure them to stay on place.

Sizes:

There is one size available which is adjustable with straps. Height of the front plastic is 25 cm and the widest part of the front plastic is 51 cm.

Weight:

1,1 kg +/- 5 %

Main materials used:

| | |
|----------------|--|
| Outer textile | Acrylic-coated nylon 180 gr/m ² |
| Inside textile | PES Charmeuse 70 gr/m ² |
